

UX/UI Style Guidelines

As we begin this journey of the Intota's user-interface, you may have questions about which assets can and should be used, and how to talk about specific areas of the product. This guide attempts to answer some of those questions. Keep in mind that we are in a time of transition; these guidelines will change over time. In doubt or have questions about possible UI usage that are not answered here? Contacts are below.

- 31 Icon sizes/spacing

Intota

is a new software-as-a-service, web-scale collection management solution that supports the entire resource lifecycle for libraries. Developed using open systems and standards, Intota provides relief to librarians by helping them work with greater efficiency, so they can devote more time to mission-critical activities.

Visual System Guidelines

32 Introduction

- 33 Color Palette
- 34 Typography
- 35 Graphic Treatments

UI Design Guideline

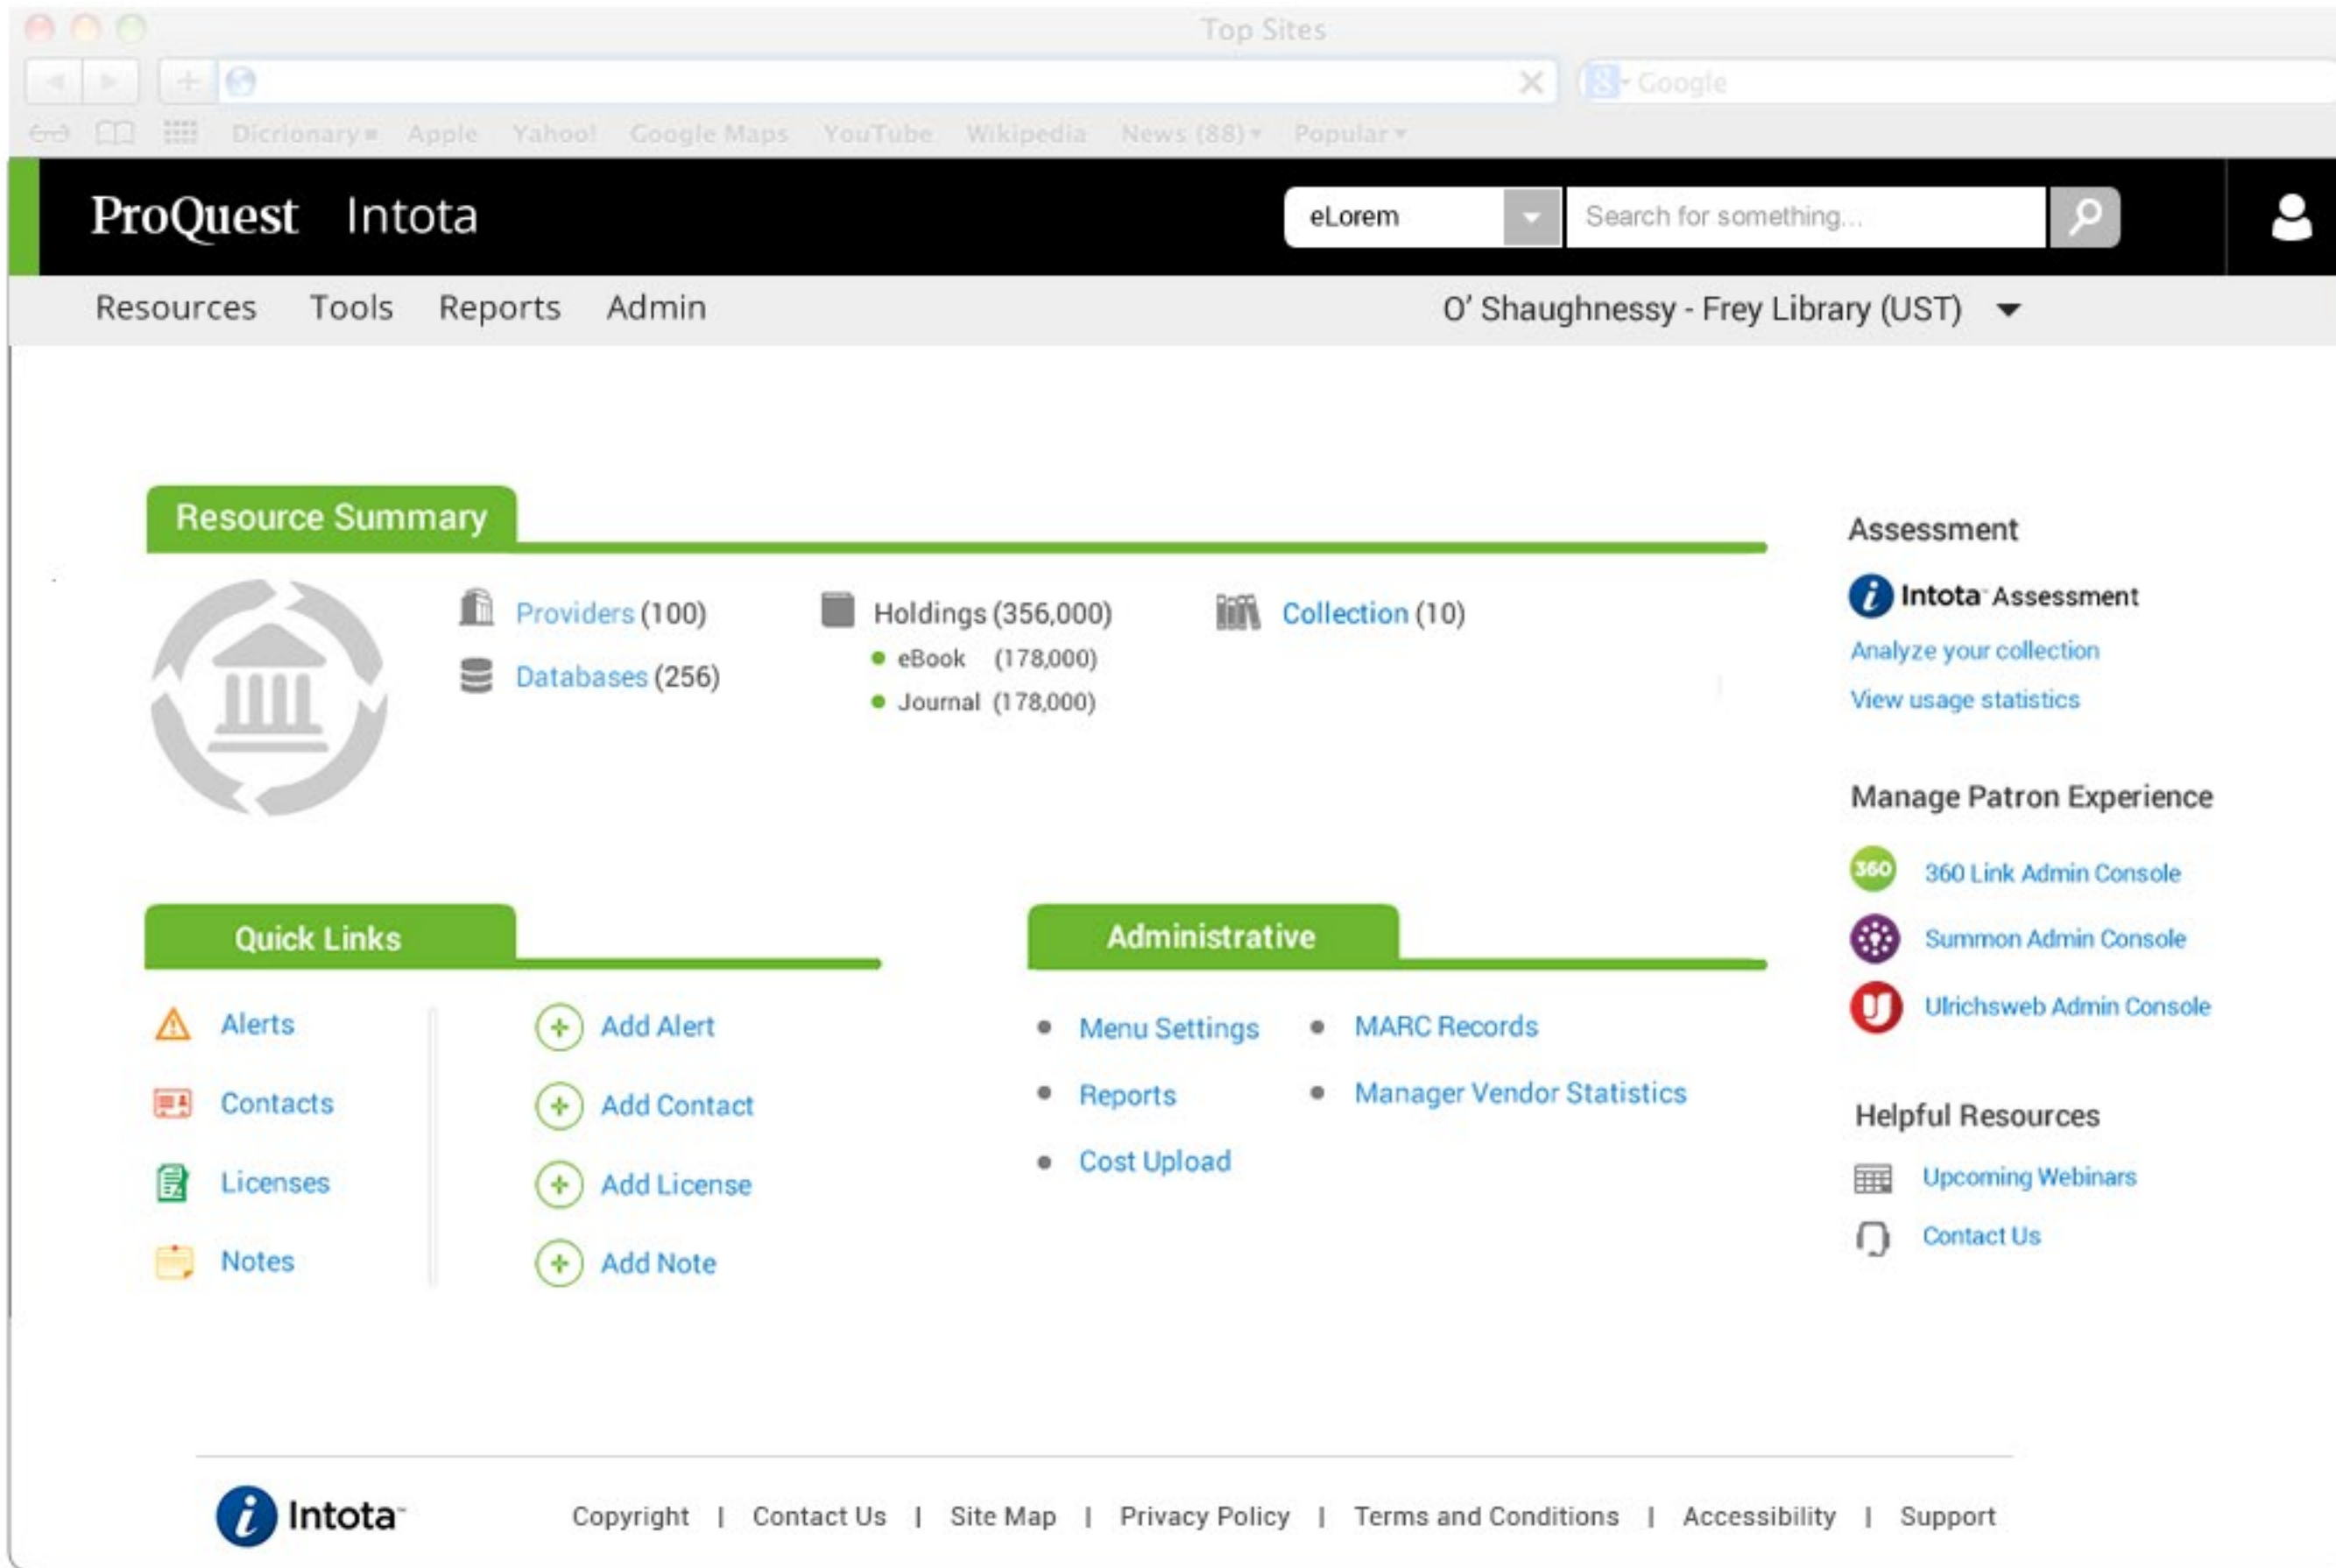

The Intota UI design consists of page types and interactive elements throughout the web-app. We began creating this solid, yet flexible, set of guidelines that will help developers, partners and vendors to produce high quality of work that helps to strengthen Intota's identity.

Intota Home Page

Masthead - Masthead will be throughout the site which will include navigation to resource sections, search functionality and multi-profile dropdown menu for selected libraries.

Home Page Content - Pathway to key sections and future update will provide more dynamic content as well.

Footer - Service as the same function as the masthead with branding and basic navigational links

Masthead - Normal state

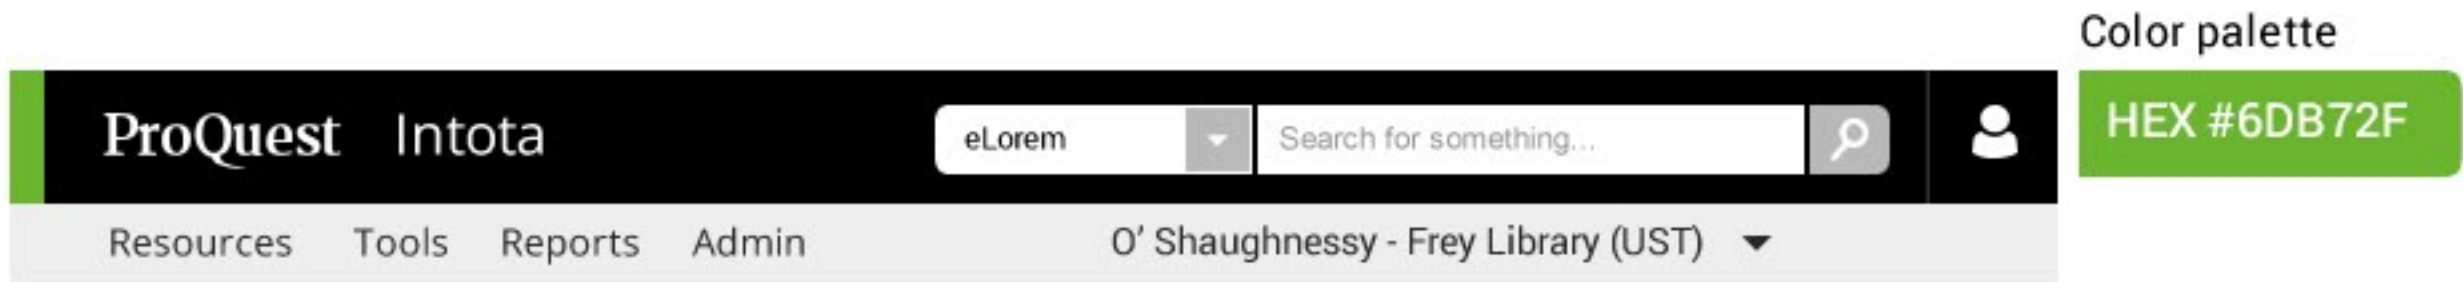

Masthead DropDown Menu - Hover state

Masthead Visual Responsive Design

Masthead will be throughout the site which will includes navigation to resource sections, search functionality and multi-profile dropdown menu for selected libraries.

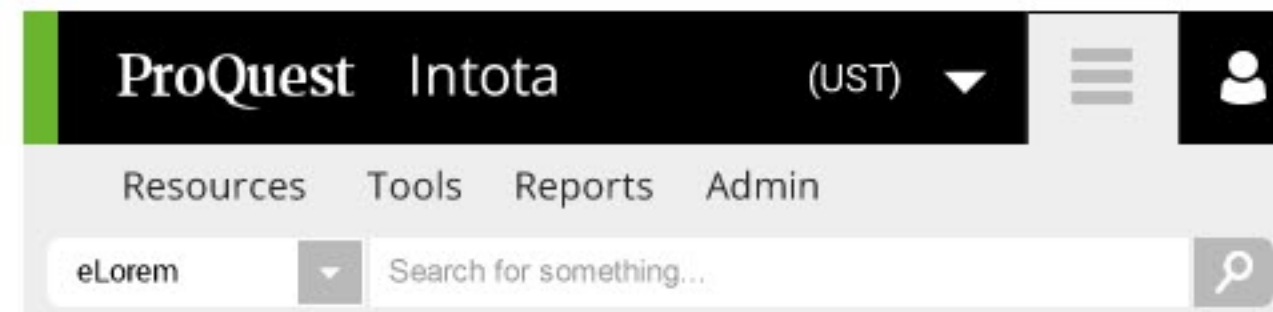

Masthead - 960px & up for Desktop

Masthead - 768px for Tablet

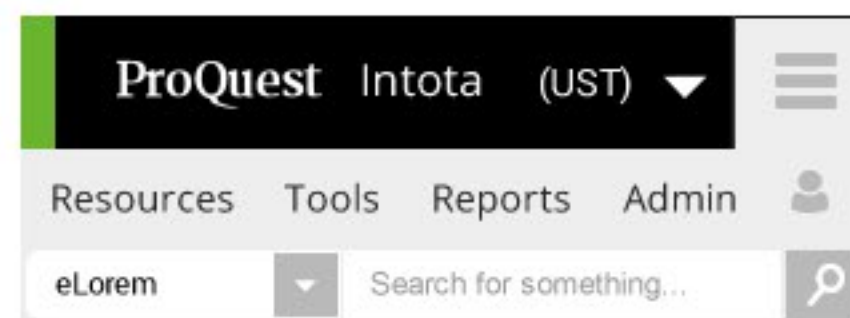

Masthead - 480px for Mobile (landscape view)

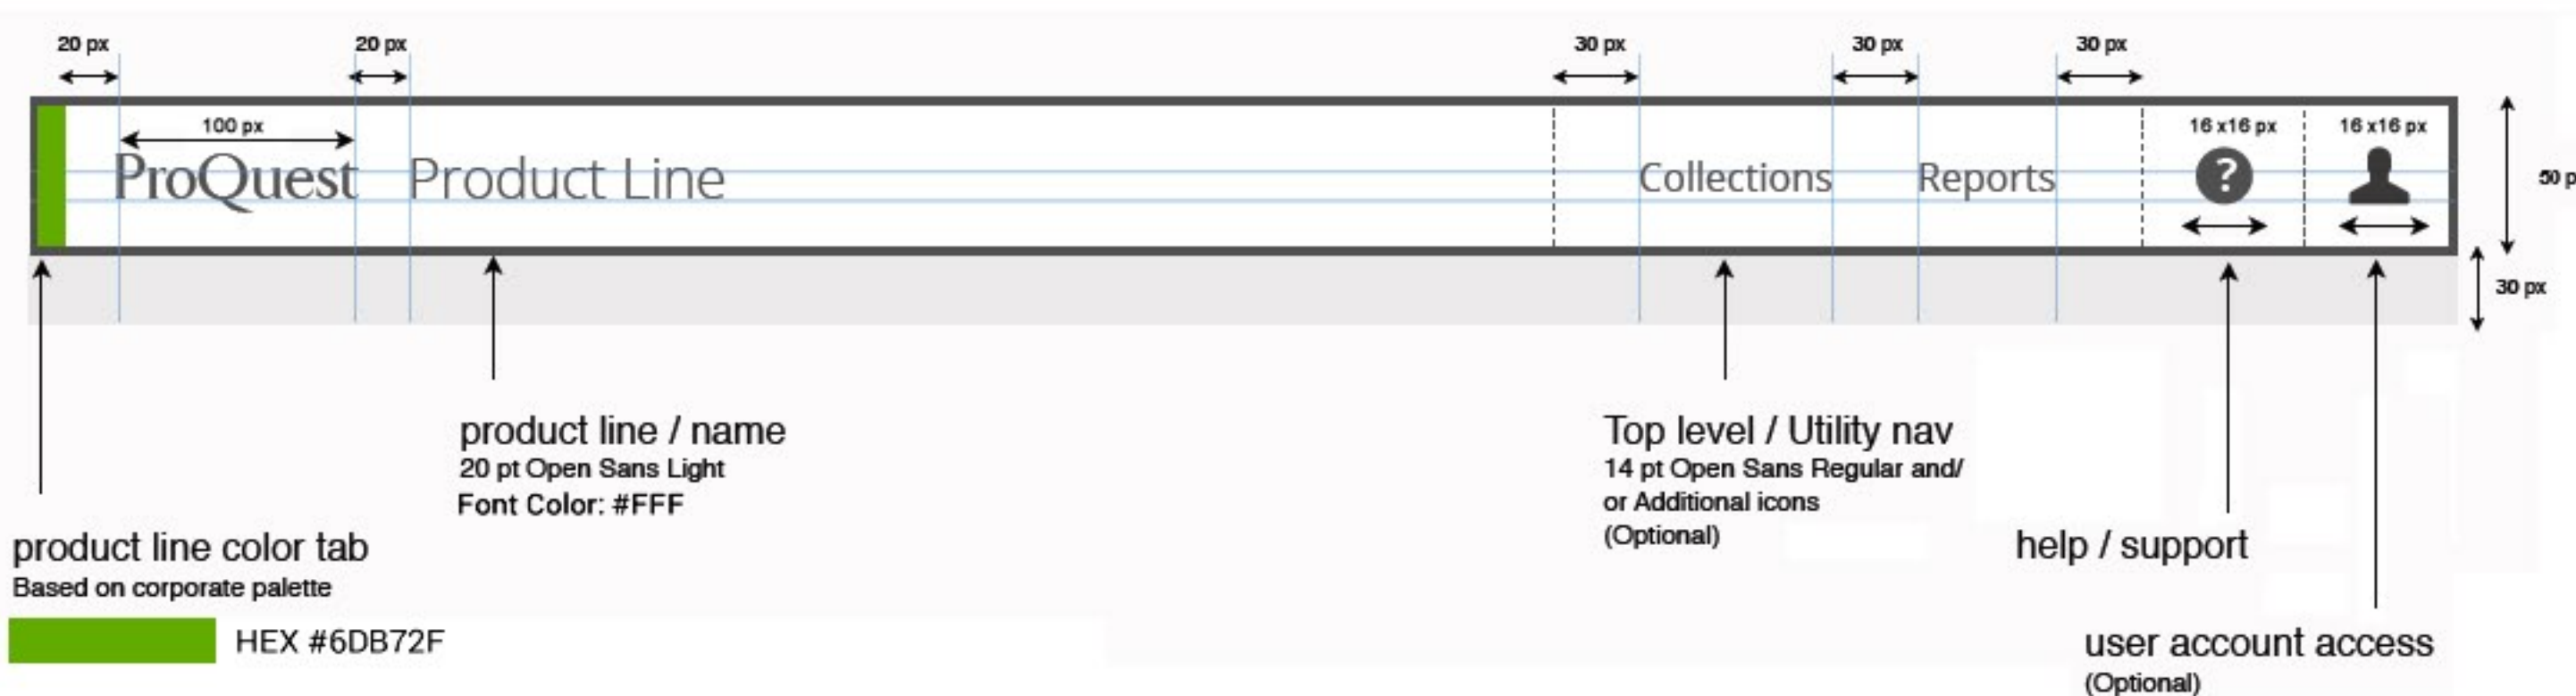

Masthead - 480px for Mobile (extended menu)

Masthead - 320px for Mobile (portrait view)

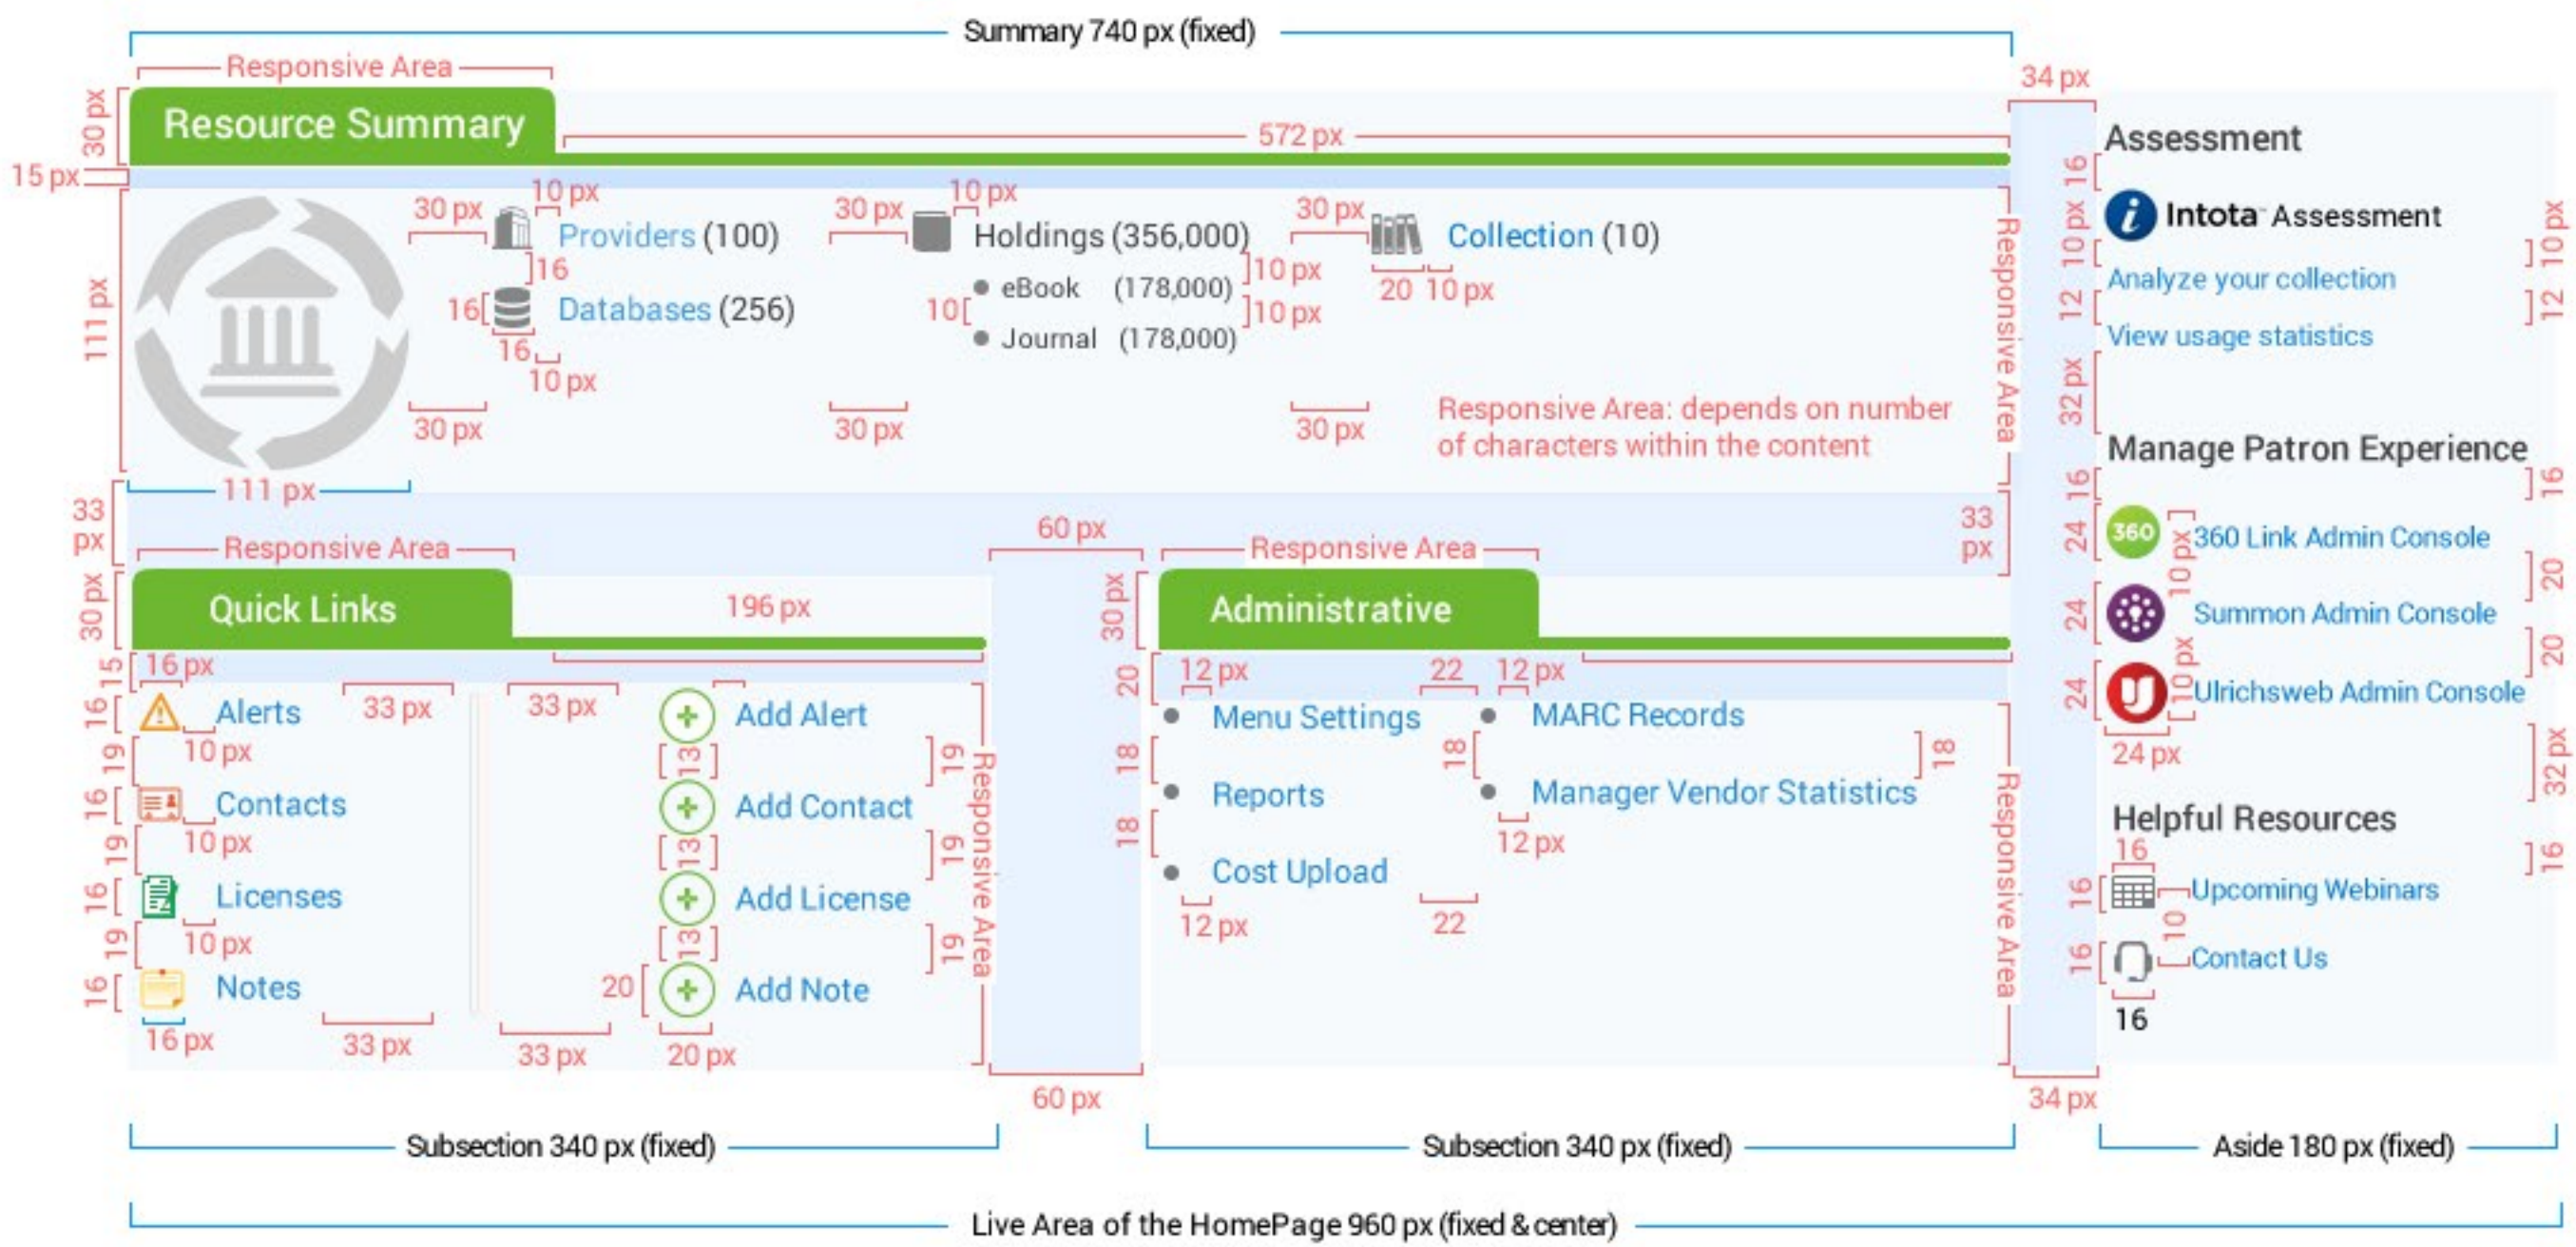

Masthead - 320px for Mobile (extended menu)

Color Palettes: HEX #6DB72F | HEX #4D4F50 | HEX #454545 | HEX #262626 | HEX #0079D3 | HEX #FFFFFF

Detail page with a tool tip pop-up

Tool Tip Style

Tool Tips is a common element in most user interface... It's used in conjunction with a cursor/pointer. When a user hovers the pointer over an item, without clicking it, and a tooltip may appear as a small "hover box" with quick action info/instructional content about the item being hovered over. Here are some tooltip styles below for reference in the development stage.

Tool Tips

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus accumsan ultrices mauris, quis congue odio.

Tool Tip A

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus accumsan ultrices mauris, quis congue odio.

Tool Tip B

Tool Tip with Buttons

Icon Assets Guideline

Intota application service is shaped in many ways; one of which is through maintaining a visual coherence of our visual icon assets. We have expanded with a new iconography style started by our UX team, we began creating this solid, yet flexible, set of guidelines that will help developers, partners and vendors to produce high quality of work that helps to strengthen Intota's identity.

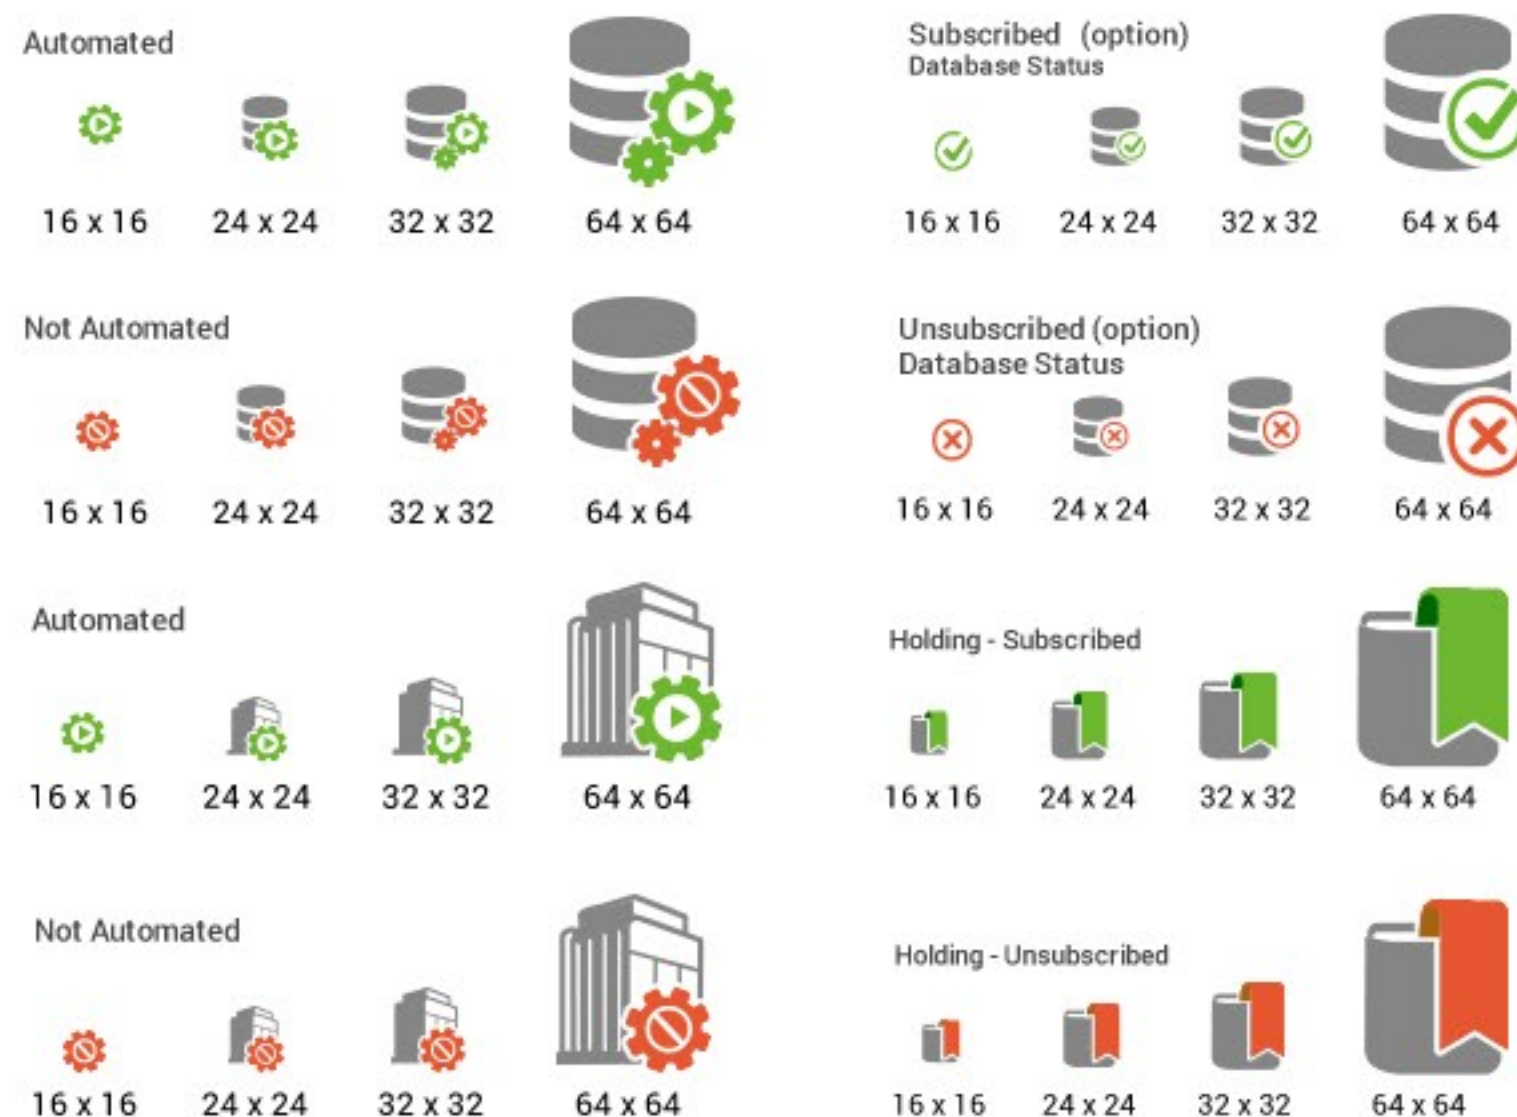

Resource Category

Icons are a quick, visual method for expressing ideas and communicating information. Iconography as a visual language serves us every day, helping to solve a specific UX and design challenges within Intota's UI

Why do you need them! Iconography is a science of identification, description, classification, and interpretation of symbols, themes, and identify different functionality throughout the UI.

Resource Icons with additional action graphic elements

You can use any one of these icons for a specific area in the Resource section. These additional icons are for active status of resources.

Like for an example: Database is automated or not automated. These icons just description the visual state of each resource within a page.

Counter Report Category

Icons are a quick, visual method for expressing ideas and communicating information.

Iconography as a visual language serves us every day, helping to solve a specific UX and design challenges within Intota's UI

Why do you need them! Iconography is a science of identification, description, classification, and interpretation of symbols, themes, and identify different functionality throughout the UI.

Icons are a quick, visual method for expressing ideas and communicating information. Iconography as a visual language serves us every day, helping to solve a specific UX and design challenges within Intota's UI

Why do you need them! Iconography is a science of identification, description, classification, and interpretation of symbols, themes, and identify different functionality throughout the UI.

Icon Size/Spacing

Icons within UI application are used as a visually and especially efficient way to represent information, action prompts or links. When loading a web page in your browser the majority of users explore the page by quickly scanning it for information that interests to them. Utilizing symbols in strategic locations instead of using words can quickly and effectively reassure the visitors that they are at the right place to do their job.

Visual System Guideline

For the Intota UI visual system is designed to be dynamic and flexible. This section will explain the use of color, typography, and other graphic elements. The flexibility of the system requires careful treatment and attention for all graphic assets. The use of these guidelines will assure that the visual system will reinforce and strengthen our identity across all the products.

Primary Color Palette

HEX #FFFFFF R255 G255 B255 C0 M0 Y0 K0	HEX #4D4F50 R77 G80 B81 C13 M3 Y0 K174 100% Tint #4D4F50 50% Tint #4D4F50 10% Tint #4D4F50	HEX #454545 R54 G54 B54 C0 M0 Y0 K201 100% Tint #454545 50% Tint #454545 10% Tint #454545	HEX #6DB72F R108 G182 B47 C104 M0 Y189 K73 100% Tint #6DB72F 50% Tint #6DB72F 10% Tint #6DB72F

Color Palette

The color palette consists of a primary palette. The lighter tints were created by screening the primary colors. The consistent use of these colors will create recognition and strengthen the Intota's identity. The Intota's UI and icons must always use the primary and supportive color palettes.

PowerPoint: Average size 18 - 28 pt

Subheader & Bullets

Use Roboto Medium
Web: Average size 13 -18 px
PowerPoint: Average size 18 - 28 pt

Body Copy

Use Roboto Regular
Web: Average size 12 -16 px
PowerPoint: Average size 18 - 28 pt

Visual System Guidelines

Typography

Intota typography consists of one typefaces: Roboto. These typefaces come in a variety of weights and offer flexibility of use. Commitment to this typeface will create a consistent and strong identity.

These typefaces should be used at all times. Contact the project manager if there is a specific request not to use the specified typeface.

Google Open Source Fonts

Google Fonts make it quick and easy for everyone to use web fonts, including professional designers and developers. We believe that everyone should be able to bring a quality typography to their web pages and applications.

All of the fonts are Open Source. This means that you are free to share your favorites with friends and colleagues. You can even customize them for your own use, or collaborate with the original designer to improve them. And you can use them in every way you want, privately or commercially – in prints or in your websites.

Image/Graphic Treatments

This search list page is an example of how the visual system comes together within the Intota UI design.

Image, color, typography and iconography all play a part in creating a unified look and feel throughout the web application.
