Get an event info by scanning posters and related materials. Consumers scan event poster to see them transformed into the world of imagination and can see trailers, download wallpapers, apps, get information or buy tickets. This concept allows promo related materials to advertise the event, but to digitally absorb captivated consumers into the environment of augmented reality. This concept increases the amount of interaction and information exchanged between a promotion and potential customers.

## Keyword search: kware or KWARE3D iAR

Download Layar 6.0 on an Android or iPhone devices. Open Layar app and search for “kware” or “KWARE3D iAR” layer. Launch the Layer and hold your phone over the target image above to explore the AR experience.
